Wire Management/Cable Organizers

DESCRIPTION

Eliminate cable clutter on patch panel racks or in your home entertainment system by routing cables as your needs dictate.

Snap-off duct fingers are easily removable without tools to simplify custom cable routing requirements, leaving a snag-free surface to protect hands and cables.

Single and double-sided panels available in 1U and 2U configuration.
Cables can be routed on the front and back of racks for patch and station cables.

Slotted duct provides ample space for cable routing.

Raceway cover included - snaps on and *off* quickly.

Standard 19" rack mounting - (4) 10-32 screws and (4) 12-24, all 5/8" long are included.

Allows for all wire media routing including: fiber optics, ScTP, and coaxial cables.

EWM WIRE MANAGEMENT PATCH CORD/CABLE ORGANIZERS
